Subject: Good Laboratory Practices Inquiry from The Hill
Attachments: GLP The Hill reporter questions 10-29.docx; Hill Inquiry- Good Laboratory Practices.pdf

Susan, Larry and John:

We received an inquiry from The Hill regarding Inspectors of Good Laboratory Practices. They provided the questions below which OC reviewed and prepared the attached responses. I also included an attachment The Hill provided which they asked if we could provide comment on (last question).

Please let us know if you have any comments/edits.

Pat

GLP The Hill
reporter question...

Hill Inquiry- Good
Laboratory Practi...

It's from an industry group about Good Laboratory Practices, and in it, the group says in 2018 that there are four Good Laboratory Practices inspectors and no support staff for 1400 labs.

Has this number changed or are there still four inspectors and no support staff?

Is this a sufficient number of people to provide adequate oversight of the Good Laboratory Practices program?

How many inspections are carried out each year?

How many studies occur overall?

How many GLP inspectors and staffers were there when President Trump took office? Would it be possible to get a yearly count of GLP inspectors and support staff over the past 5 to 10 years?

Would you like to offer any additional comments on the email (attached)
